## Commitment to achieving Net Zero

Redbay Ltd is committed to achieving Net Zero emissions by 2030.

## Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Redbay Ltd is an SME that works primarily on our client's sites. The firm's assets are purely IT based and therefore our emissions are correspondingly low. To that end the scope 2 emissions are based on 4 people working from home per year. The vast majority of our emissions are Scope 3 emissions involving the travel and accommodation for staff when working away from our contracted sites.
